

The background of the slide features a photograph of a large crowd of people at an event, with many hands raised in the air. The image is overlaid with a semi-transparent blue gradient that covers the left and bottom portions of the frame. In the bottom-left corner, there are faint, light-blue geometric line patterns resembling a network or molecular structure.

Wristband

Design

Fully Customizable

Soft and water resistant textile wristbands, fully customizable with the possibility to include a serial number, bar code and a QR code.

Tagging Technologies

Each wristband has an unique numbering (QR Codes, Barcodes or Serial Codes) and RFID (NFC) technology allows the control access and record information in a safe and secure way.

The RFID antenna is so discreet that the user does not have the perception that it exists on the wristband.

Bracelock®

The closing system we consider to be the most modern and innovative is the Bracelock®.

Is distinguished by its ergonomics, aesthetics and excellent inviolable functionality with a metallic element inside.

Possibility to customize through moulding technology.

Customizable

*Possible to have specific colors upon demand.

Seal

Standard Colors

Other Locking Systems

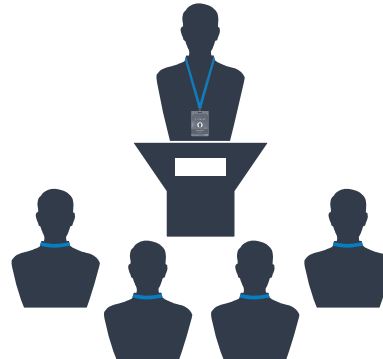

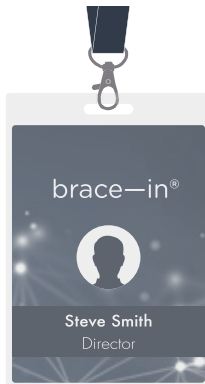

There are also other locking systems besides Bracelock®.

Other Supports

Stickers

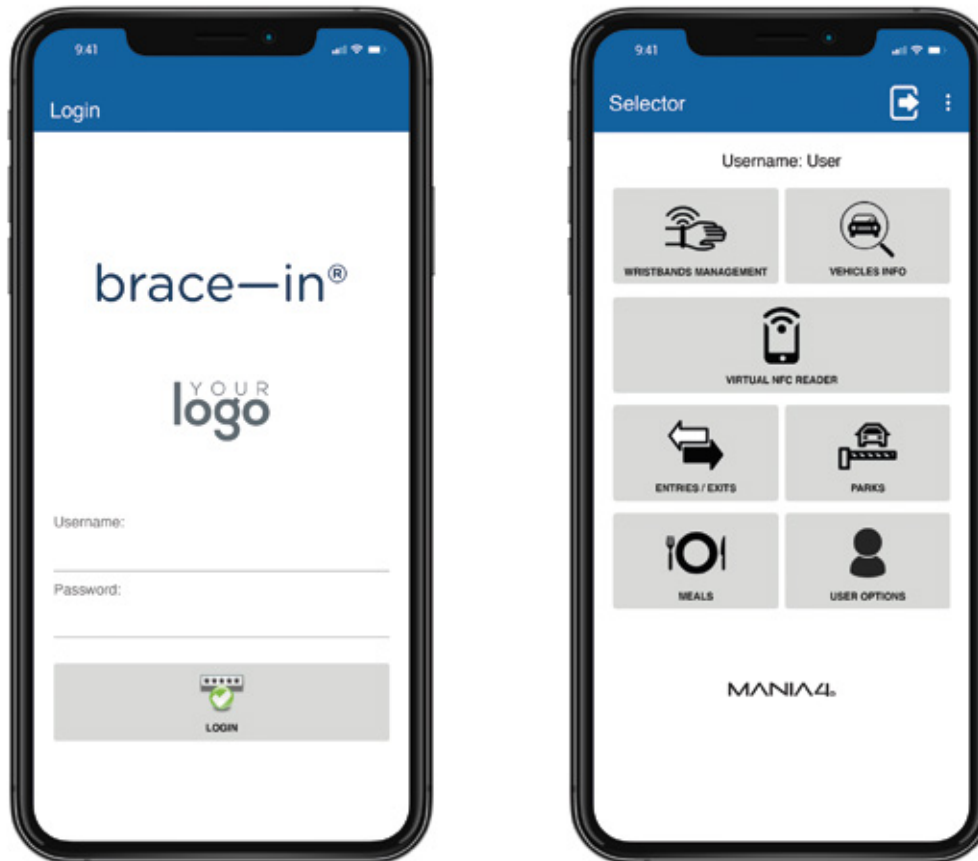

Custom RFID stickers to manage fleets, parking lots, access control, accreditation and more.

Cards

Recycled paper cards for access control that can be bonded to a lanyard.

Mobile App

Mobile App

Use a smartphone with NFC or a PDA as a terminal (access control and functionality management).

The application has custom views depending on the type of user.

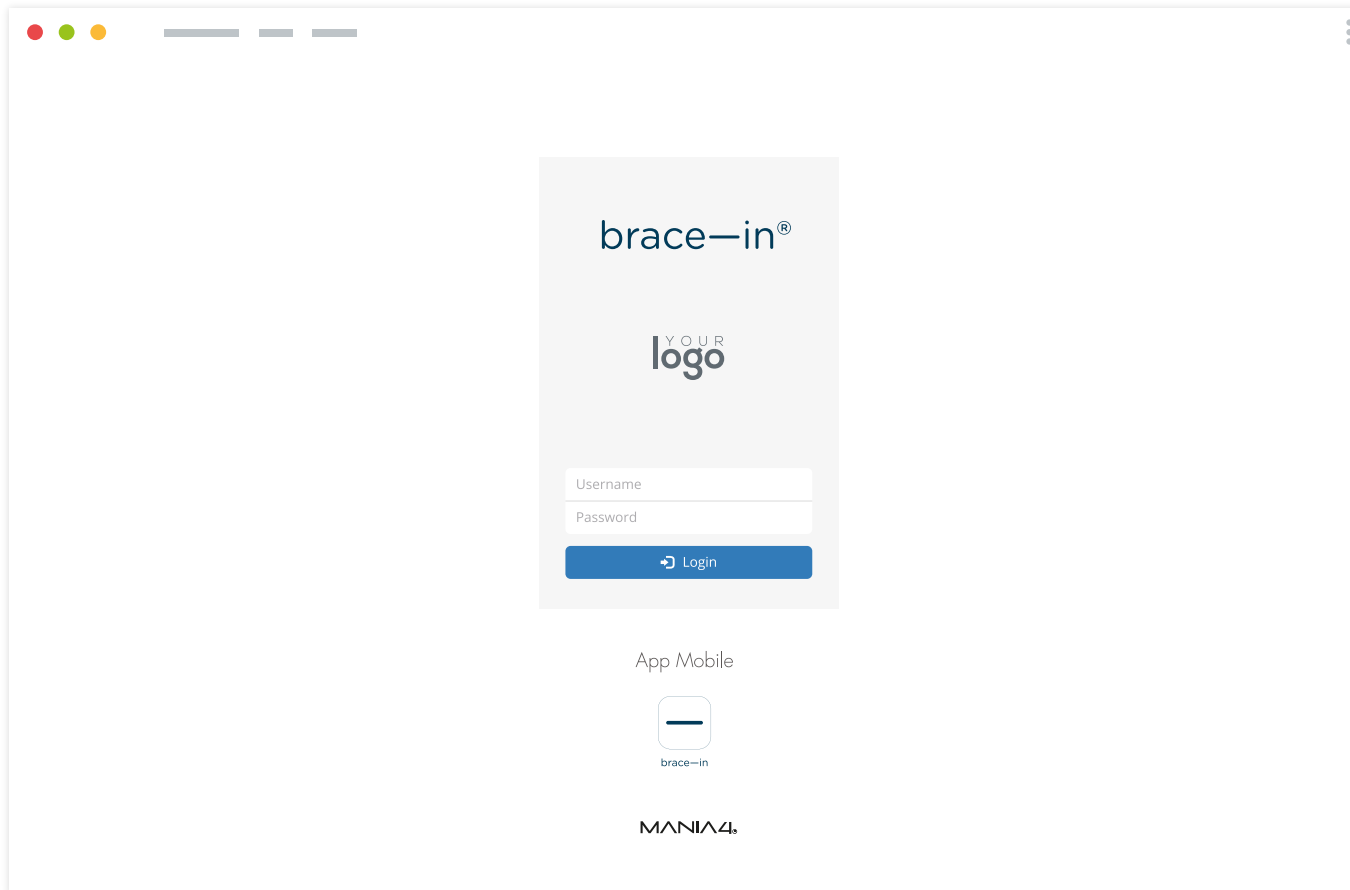

Demo Platform

Contact us and have the necessary permission for a trial version.

Cloud Based Platform

Web Platform

The management platform is cloud based, allowing the implementation of a system with minimal hardware.

Connect to the platform using a PC, tablet or smartphone with internet connection. Access is secure and there are different levels of access depending on the user.

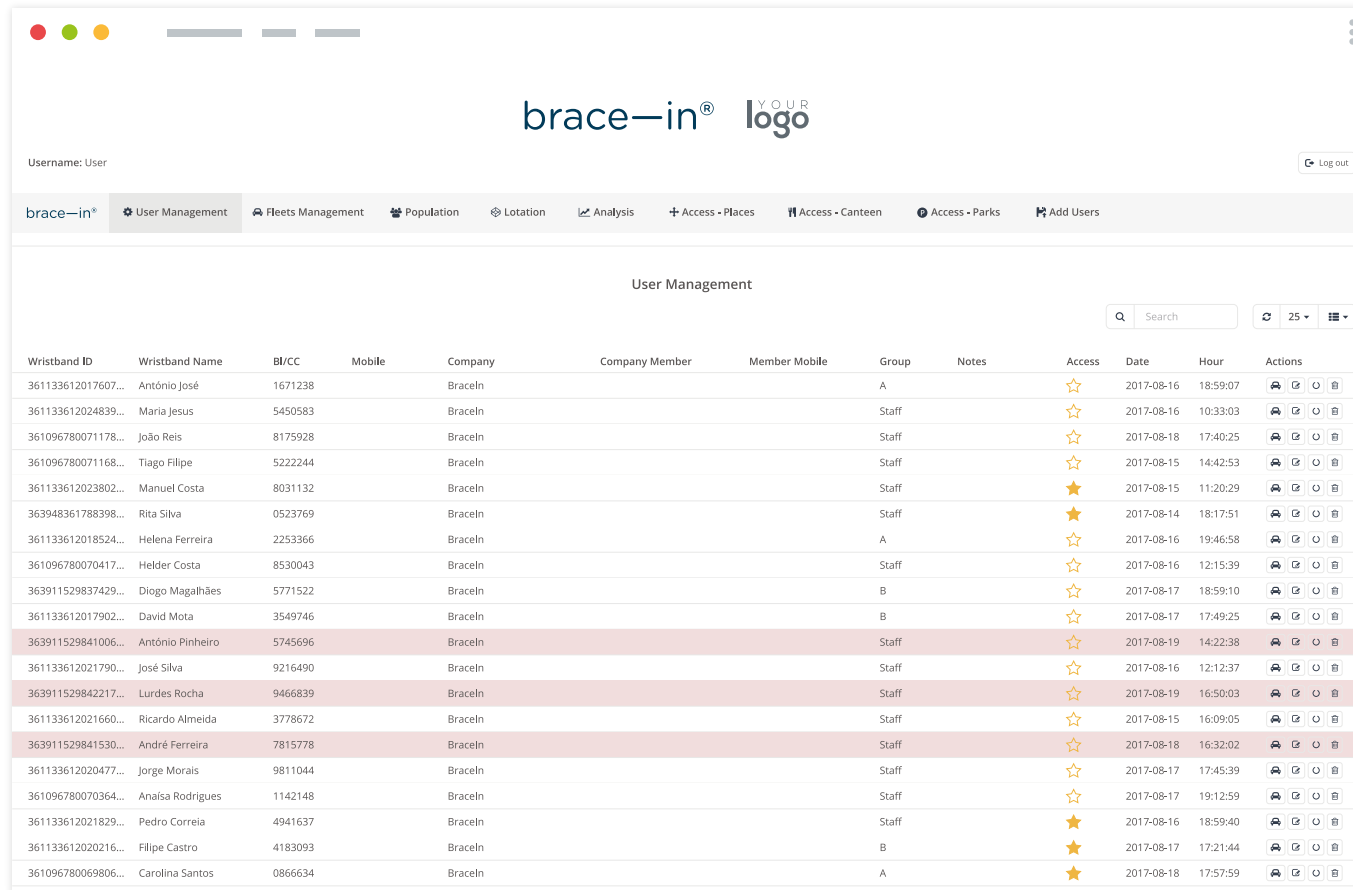

Includes pre-registration tools for users to facilitate the accreditation process.

Customizable

The platform is customizable according to customer requirements and with customized developments.

Cloud Based Platform

The screenshot displays the 'brace-in®' web application interface. At the top, the logo 'brace-in® YOUR logo' is visible. Below the logo, there's a navigation bar with various menu items: 'User Management', 'Fleets Management', 'Population', 'Lotation', 'Analysis', 'Access - Places', 'Access - Canteen', 'Access - Parks', and 'Add Users'. The 'User Management' section is currently active, showing a table of users. The table has columns for 'Wristband ID', 'Wristband Name', 'BI/CC', 'Mobile', 'Company', 'Company Member', 'Member Mobile', 'Group', 'Notes', 'Access', 'Date', 'Hour', and 'Actions'. The 'Access' column contains star icons, some of which are highlighted in yellow. The 'Actions' column contains icons for editing, deleting, and other functions. The table is filtered to show 25 records.

Management

The platform manages information allowing special reports about:

- Users
- Vehicles
- Meals
- Accesses
- Lotations
- Credits

Cloud Based Platform

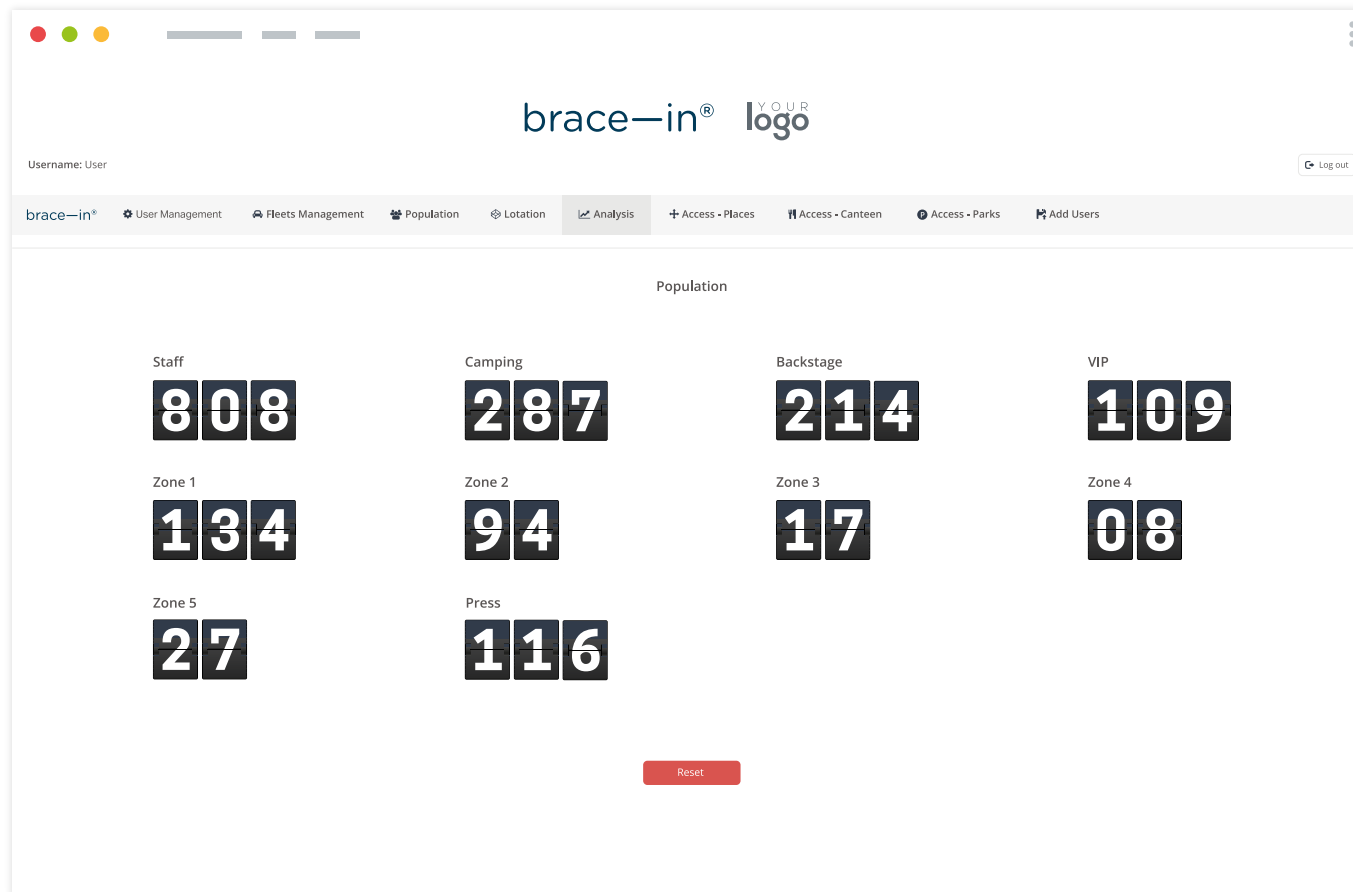

Data Analysis

Data analysis and statistics are available to better manage and understand the dynamics of your event.

Search and view the information for a certain period of time.

Possibility of printing access reports and data analysis.

Cloud Based Platform

Lotation Management

The lotation control allows the management of the place lotation or the number of entries of each zone.
